ALLOWANCE

This action is in response to Applicant's submission dated July 3, 2008, in which Applicant elected with traverse Group III drawn to the preparation of compounds of Formula (1). Claims 1-9 are allowed.

Election/Restriction

Applicant argues that Groups III, IV and V recite a single general inventive concept. Examiner finds this argument unpersuasive because each of the three Groups III, IV, and V prepare compounds employing different steps.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-9 are examined. Claims 10-26, the remaining subject matter being drawn to the non-elected invention are withdrawn per 37 CFR 1.142(b).

A complete reply to this action must include cancellation of non-elected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Information Disclosure Statement

The references contained in the IDS dated January 26, 2007, October 6, 2006, September 20, 2005, and June 7, 2005, are made of record.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In a telephone discussion dated November 10, 2008, Applicant gave Examiner authorization for this Examiner's Amendment.

The Application has been amended as follows:

Claims 10-26: CANCELLED.

Reasons for Allowance

The following is an Examiner's statement of reasons for allowance: the elected invention is free of the prior art and the form of the application is acceptable. The closest prior art is Adams, et al., U.S. Patent No. 5,593,992. Adams, et al. teaches processes to make pyrimidine compounds very similar to the instant elected process. Instant claim 1 has the following claim limitations: a) reacting a compound of formula $R^1\text{-CO-CH}_2\text{-E}$ with a compound of formula $R^2\text{-CHX}^1\text{X}^2$ in the presence of a compound of formula $R^3\text{R}^4\text{N-C(=NH)N H}_2$ and a catalyst to form a dihydropyrimidine; and b) oxidising the dihydropyrimidine to form the compound of Formula (1). Scheme VI found in columns 21-24 of the reference lacks this second step.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
